COLD STORAGE EGG INDUSTRY

Infalible Rule is for Farmer to Market Product as Soon as Possible After Laid.

(By M. M. HASTINGS)

The cold storage egg industry is a development of the last twenty-five years. Undoubtedly the industry as a whole has been of great benefit to both egg producer and egg consumer, and has resulted in a large increase in the fall and winter consumption. This means a larger total demand and a consequent increase in price.

Owing to the fact that eggs are spoiled by hard freezing, they must be kept at a higher temperature than meat and butter. Temperatures of from 29 to 32 degrees Fahrenheit are used in cold storage of eggs. At such temperatures the eggs, if kept in moist air, become moldy or musty. To prevent this, the air in a first-class storage room is kept moderately dry, which shrinks the eggs, though much more slowly than would occur with out storage. The growth of bacteria in cold storage is practically prevented. If bacteria are in the eggs when

Egg Room in a Large Eastern Cold Storage Plant.

stored, the growth will be checked, but activity will begin again when the eggs are warmed up.

Speaking generally, the cold-storage egg, while not unwholesome, is inferior in flavor and strength of white to a fresh egg. The cold-storage egg can be very nearly duplicated in gross appearance and quality by allowing eggs to stand for three or four weeks in a dry room. Cold-storage eggs, when in case lots, can be told by the candler because of the uniform shrinkage, the presence of mold on cracked eggs, and perhaps, the occasional presence of certain kinds of spot rots peculiar to storage stock; but the absolute detection of a single cold-storage egg by candling is, so far as the writer knows, impossible.

With the present prevailing custom of holding fall eggs without storage facilities, it is frequently true that eggs placed in cold storage in April are superior to current fall and early winter receipts. Cold-storage eggs are usually sold wholesale as cold-storage goods, but are retailed simply as "eggs."

The fall eggs offered to the consumer cover every imaginable variation in quality, and the poorest ones sold may or may not be cold-storage stock.

Occasional articles have been printed calling attention to the fact that the cold-storage men were reaping vast profits which rightfully belonged to the farmer, and advising the farmer to send his own eggs to the storage house or to preserve them by other means. As a matter of fact, the cold storage of eggs has not of late years been particularly profitable, there having been severe losses during several seasons. Even were the profits of egg storing many times greater than they are, the above advice would still be unwise, for the storing, removing and selling of the farmer's individual case of eggs would eat up all possible profit.

When eggs in the hands of large operators are properly preserved in cold storage, the best and most efficient methods known are in reality at the farmer's service. Because of the severe competition that prevails in egg storing, the farmer is paid all the increase in price which the business will stand. A comparison of the summer prices of eggs now with summer prices before days of cold storage will substantiate the truth of this statement.

Use Charcoal Freely.
Charcoal should be freely used in the poultry yard. Pounded fine and mixed with the soft feed fed to the fowls. It cleanses the system of impurities. As it acts upon the blood it acts upon the life of the fowl. When the blood is thick and clotted, a dull, sick chicken will soon follow. Thin blood means vigorous circulation, and on a good circulation of blood, health largely depends. If your fowls lack activity, they need something to stir the blood out of its sluggishness. It is best to keep the charcoal in a dry place, and when needed, grind or pound some fine and mix with soft food.

Turkey Growing.
Turkey growers in middle Tennessee report a very poor crop this season. Not 20 per cent. of the poultry hatched were raised, owing to the long-continued cold while the poults were very young. All told, there will be scarcely half an average crop.

GOOD ROADS

HISTORIC ROADS IN VIRGINIA

Day of Old-Fashioned Overseer and Irregular Force of Hands Past—Machines Now Help.

(By F. W. FITZPATRICK, in the Sentinel)

When the good roads movement began a few years since, a movement that now embraces nearly every county in the state of Virginia, Charles City county fell into line and since then has kept step with the march of progress, along the plan of better public highways.

I have just made a little trip over some of those greatly improved roads, and as I was preparing to take a photograph showing a section that had been worked, an automobile spun by at such a rate of speed as to make me wonder at the transformation in that same piece of road where in days gone by (not so long ago, either), it took a good team of mules or oxen to drag a load over it, writes J. M. Hall in the Southern Good Roads.

The same may be said of the majority of the public roads of this historic county—famous as the birth place of two presidents of the United States, William Henry Harrison and John Tyler, also congressmen, judges, etc., who are remembered for their good work in their separate lines. In connection with the good roads question here, it may be said that history recounts the fact that when Thomas Jefferson married the fair widow Shelton, of "The Forrest," in Charles City county, he began his wedding journey to Monticello in a coach, but he reached his beautiful estate in Albemarle county, the coach was deserted on account of the roads (it was the month of January). So the distinguished statesman and his bride made the rest of the trip on horseback. It was consoling to know that the wedding coach was able to traverse the Charles City roads even at that date, and that the bride couple got past the county lines before they took to horseback.

Since that early period and along up to the past five years I maintain a certain reticence in writing up the history of the public roads of this particular section of the old commonwealth. Enough has been said by them by others, those who performed the task of traveling regularly and in all seasons. The day of the old-fashioned road overseer seems to be past; the irregular force of hands, each bound to give a day or so in labor each year to the maintenance of the roads, has past.

This county, divided into three districts, has a regularly appointed road superintendent for each district, whose duty it is to employ good teams, machinery and men to work the roads of his particular district. By this method the money furnished for road work can be expended in such a manner as to give the best results, and the work done is of not only a better but a more lasting nature.

On or near many sections of the roads there are gravel beds, and when possible quantities of this material are used, especially on pieces of clay road, which become muddy in wet weather. A thick layer of this gravel and sand does wonders in solidifying these stretches. The road machines are helping much—in fact, are valuable in rounding up the roads and raising them in the center. Clearing up the timber on each side of the roads, admitting light and sun, has tried out places wet so long that up to recent date the memory of man runneth not to the contrary. Many old bridges have been replaced by new and more substantial ones, while in places terra-cotta piping has been installed for cross drains.

It is gratifying to note that in the neighborhood of two hundred miles of public highways in this county are in such fine condition at the present writing that they can be traversed by automobiles with safety and pleasure, while the ordinary citizen who so far has not been able to become an auto owner, can speed his nag along at the best pace of which the nag is capable without any fear of his plunging into broken hedges, bottomless mud holes or the like, provided he stays in the road.

It looks today as if Charles City county, so famous as the birthplace of great statesmen, fine plantations and old-time hospitality, will soon be equally famous for its good roads and, in passing, let me say that the Superintendent of the Tyler district and Davis of the Chickahominy district are building very fine leading landmarks in the way of fine roads in their respective districts.

Encouraging Development.
Texas, through its good roads association and State Automobile association, is encouraging the development of highways especially for the benefit of farmers who own and drive their own motor cars—and the percentage, it is reported, of cars sold to farmers in this state has more than doubled in the last six months.

Well Drained Road.
Any kind of a well-drained road is good.

FARM ANIMALS

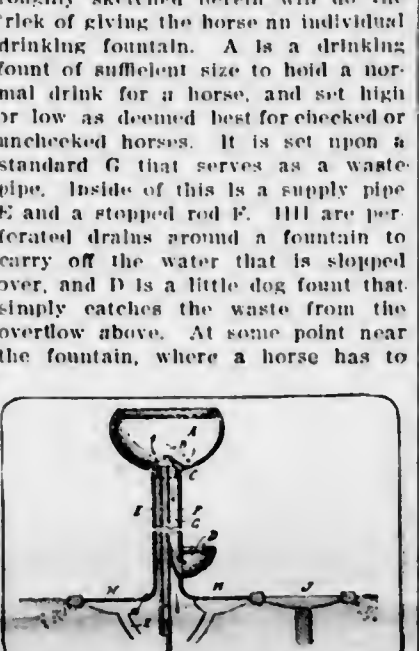

HORSE TROUGH IS SANITARY

Device Shown in Illustration Will Provide Horse With Clean and Individual Fountain.

(By F. W. FITZPATRICK, in the Sentinel)

It has been found that the horse trough has proven a prolific means of carrying infection. Hundreds of horses have taken glanders, and all sorts of things via that means. Not that the horses touch the iron part of the trough and leave germs there, but simply that a healthy horse drinks immediately after a diseased one and gets the germs, spume, etc., left in the water by the other. The idea suggests itself that the horse be given a hygienic drinking fountain, as is provided for us humans.

We can't expect a horse to put his mouth over a little stream shooting in the air, but the device that is roughly sketched herein will do the trick of giving the horse an individual drinking fountain. A drinking fountain of sufficient size to hold a normal drink for a horse, and set high or low as desired best for checked or unchecked horses. It is set upon a standard G that serves as a waste pipe. Inside of this is a supply pipe E and a stopper D. H is perforated drains around a fountain to carry off the water that is slopped over, and D is a little dog fount that simply catches the waste from the overflow above. At some point near the fountain, where a horse has to

Sanitary Horse Trough.

place his front feet in order to drink from the fountain, would be a platform device J, not unlike a scale platform. Normally, the stopper C is in position D and the fount is dry. By a simple system of levers, etc., when a horse approaches to drink he is bound to get his front feet on J (that yields sufficiently to operate the mechanism, but not enough to bother or fuss a horse) which closes down stopper C and opens the valve in E, and as long as he stands there that valve is open and the water is running. When he leaves that position the water is closed off, the stopper rises, and the fount is empty of any residue water. Each horse gets a drink of fresh, clean water and the tank is flushed after every drink. The saving of water over the continuous running tank is also an item in its favor. Plus which, it is an anti-freezing fountain. The water valve can be, as in most drylands, well below freezing and a self-drainer; and there being no water left in the tank, it is a fount that can be kept in operation all winter. And it would be a simple enough matter to so protect J that that mechanism wouldn't necessarily fill with water and freeze.

LIVE STOCK NOTES.

Rape is a valuable forage plant for hogs.

Red clover makes an excellent pasture for hogs.

An old straw pile is not the worst kind of winter hog pen.

In shipping lambs, keep the culls at home or sell to local buyers.

Keep a record of each sow to determine her worth as a breeder.

Never kill a pig for market or home consumption until it is ripe or fit.

Hogs are among the most cleanly animals if they are given a fair chance.

Avoid an excessive amount of forage that has been more or less affected by frost.

Handle the young boar carefully. Teach him to obey the word, and to walk ahead of you.

Oil meal is greatly relished by lambs and helps greatly in the fine finish obtained in feeding.

When outdoor exercise and sunshine are lacking, the pigs should have a wide variety of feeds.

Arrange for plenty of yard room, and on all fair days keep the sheep in the open air as much as possible.

Fattening sheep must be made to eat as much as possible, but must never be made to turn from their food.

The shoeing of the farm horses should receive the same attention that is given the road horse or the trotter.

It is a great mistake to keep sheep in a warm pen in winter. Their fleece protects them, and if they are kept dry they will require nothing else.

Corn meal is not suitable for little pigs. They should have new milk and lime water and gradually this might be thickened with middlings, oatmeal and flaxseed meal.

AMONG SMALL FRUIT BUSHES

After All Danger of "Bleeding" Is Past Grape Vines Should Be Pruned—Other Details.

(By R. C. WEAVERSTONE)

With the exception of raspberries, which should be attended to early in the spring, all the small fruit bushes should be pruned, sprayed and fertilized during the late fall months. This will include the gooseberries, currants, blackberries, grape vines, etc.

After all danger of "bleeding" is past, the grape vines should be carefully pruned and all posts and trolleys straightened up, which will guard against doing this work in the spring at a time it will damage them. Old straw or corn stalks make a good fertilizer here and then a goodly percent of common wood ashes should be supplied to furnish the desired murate of potash, which will keep down the too rank growth, thus guarding against fungous diseases and rot and giving the fruit an excellent flavor and good size.

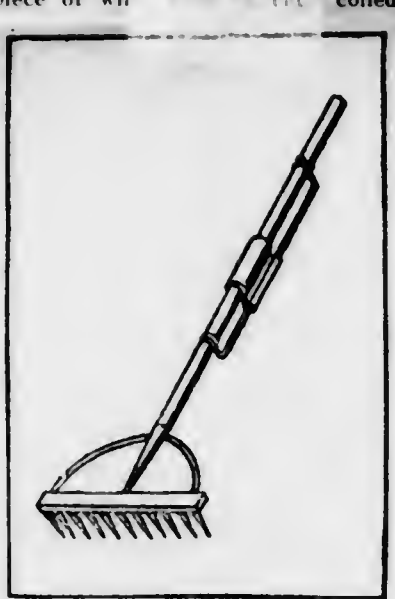

All fruit bushes or orchard trees that are where the rabbits can reach them should be wrapped in thick paper, gunny sacks, corn stalks, screen wire or the regular tree protectors made of veneer, this protection extending 18 or 24 inches from the ground, so the snows of winter will not enable the animals to gnaw the bark from the trees.

Young and tender fruit plants should be carefully bent down to the ground, a quantity of straw placed on them and a few spadefuls of dirt carefully spread over them to protect them from severe freezing till spring, when this straw may be scattered around them for fertilizer.

GRIP ATTACHMENT TO RAKE

Device Invented by New Jersey Man Prevents Blistered Hands—Movement Is Limited.

Any person who has ever used a rake will recall, if they stop to think, that the raking was usually done with one hand. The other hand was used merely as a sliding grip to guide the implement. After a few hours of this sort of work a person who is not accustomed to it is apt to find blisters on the hand that played the guide. To obviate this a New Jersey man has designed a sliding grip that is attached to the rake handle. A long piece of wire is coiled

Rake Attachment.

around the handle, extends parallel to the latter for some distance. The grip, which may be of rubber or cork, or any suitable substance, slides back for the hand and the handle. This wire acts as a stop so that the movement of the rake is limited to a reasonable space.

CARE FOR SPRAYING OUTFITS

Pumps Should be Stored in Winter Where They Will Keep Dry—Clean Them Thoroughly.

(By F. L. WASHINGTON, Minnesota Extension Station)

In leaving spraying pumps for the winter see in the first place that they are stored under cover where they will be kept dry. Clean them thoroughly, taking particular pains to drain out any water which may remain in the pumps and from the jack or of the gasoline engine. If power pumps are used, bearing in mind that a valuable engine can be practically ruined by water being left in the water jacket and freezing.

A liberal application of engine oil to all the working parts of the engine in the fall will do much to keep off rust. Nozzle and hose should be cleaned out and dried. Any wooden barrels or tanks used as reservoirs should be put away from the sun, preferably in a moist place.

If any insecticides are left over, put them on a shelf out of the way, properly labeled. Remember that Paris green deteriorates by being kept in the open air. Arsenate of lead, which one desires to keep for the following year should have a good covering of water to prevent its drying.

Danger From Rotten Apples.

One of the first things to be done is to pick up and burn or bury all refuse fruit in the orchard which is decaying or entirely rotten. These form veritable hot beds for the numerous orchard pests to liberate in during the winter months, being also ideal places in which the same pests deposit their eggs for next season's hatching, and by shaking off all the apples that are still clinging to the branches of the trees and picking up all that are under them, next year's crop of orchard pests will be considerably cut down.

Young Women
Read what Cardui did for Miss Myra Engler, of Fairbault, Minn. She says: "Let me tell you how much good Cardui has done me. As a young girl, I always had to suffer so much with all kind of pain. Sometimes, I was so weak that I could hardly stand on my feet. I got a bottle of Cardui, at the drug store, and as soon as I had taken a few doses, I began to feel better. Today, I feel as well as anyone can."

TAKE The CARDUI Woman's Tonic
Are you a woman? Then you are subject to a large number of troubles and irregularities, peculiar to women, which, in time, often lead to more serious trouble. A tonic is needed to help you over the hard places, to relieve weakness, headache, and other unnecessary pains, the signs of weak nerves and over-work. For a tonic, take Cardui, the woman's tonic. You will never regret it, for it will certainly help you. Ask your druggist about it. He knows. He sells it.

Entered at the Greenville, Ky., postoffice as second-class matter.

FOR COUNTY COURT CLERK.

We are authorized to announce the candidacy of J. Leo Frazier for clerk of the Muhlenberg County Court, subject to the action of the Democratic party.

Undertaking the prevention of floods in an effective way is another little job for congress and the legislature to undertake.

That Ohio bill to prevent the wearing of the peckoo waist looks like a subtle slam at the "see America first" campaign.

Women who shoot their husbands have a grievance, however, as the state still insists upon putting them through the formality of a trial.

No more man can figure out why it is that the little hats for women cost just as much as did the big ones.

Mail boxes, mail wagons and mail cars are to be painted red. See how the postoffice department has gained in courage since defying the express companies!

PRESIDENT WILSON showed signs of greatness when he signified his unwillingness to keep the yacht Mayflower for his personal use, but he proved it beyond dispute when he refused a pass to the theater.

Those who go down to the sea in ships may after all be safer than inland dwellers, and justify the old salt, who on a wild night of storm bellowed to his mate: "Lor, Bill! Think o' them one-lantern on a night like this!"

From the Mincea (Tex.) Monitor we learn that in that thriving city of some 2,000 souls the automobile has become a menace to life and limb, and that it's becoming unsafe to cross the streets. There are three automobiles there now, and another in prospect.

There are always revolutionists in art. Before the cubists we had the impressionists and the colorists. Aubrey Beardsley and the weird poster, the postimpressionists of Ruskin's time, and so on back to the dawn of art. And how dull the world would be without even its revolutionists who are wrong!

J. FREDERICK MORGAN died at noon Monday in Rome, where he had been for some weeks in hope of getting relief from a nervous breakdown. He was one of the world's leading financiers, and was the foremost man in the country in his commercial career. The body will be brought to New York, and interment will probably be made at Hartford, Conn.

Merriment En Route.

Who that has traveled, even if he has traveled but little, has not met a testy individual who grudgingly and with evident mental reservations told him a ticket from hither to yon? Who that has traveled has not marveled at the unexplained anxiety of some uniformed personage to whom he was required to hand that same piece of railroad paper? Who does not know the freezing anxiety of porter, or train caller, or other superman whom one commonly meets in a single day's journey? Though the scenery be unspeakably lovely, though the landscape laugh in sunshine and in fatness, though the cities appear and disappear as if by magic, these marvels lose much of their appeal by reason of the depressing melancholy which blights the cheeks of the sad, the in-

soluble functionaries who run the trains.

This solemn feature of railroad travel is now to be changed. It will be changed at least on one railroad if officials of the Chicago, Milwaukee & St. Paul have their way. Not content with teaching their employees to consider always the safety of passengers and of themselves and to remember that economy is a blessing, the managers of this road now hope to induce their coworkers to spread sunshine as they go. Those hard working and serious minded men have received printed instructions such as these: "A good laugh is better than medicine." "Learn to stop croaking." "Learn how to tell a story."

One may admire the self-confidence of the optimists who seek thus to pierce the depths of the gloom which ordinarily envelops those who guide the traveler on his way. Railroad managers, being noted for their remarkable achievements, may be able to transform in a twinkling a raucous conductor or who has hitherto been endowed with the solemnity of a bishop. It is even possible that a little trip by rail will soon come to be a side splitting experience made memorable by the merry quips of an uproarious train crew that hitherto has been invariably sunk in the depths of a nameless grief.

Good Roads Meeting in Louisville.

There will be a State meeting of the County Road Engineers at the Seelbach Hotel, in Louisville, April 7, 8, 9. The meeting will be open to any and all persons interested in good roads, and the program is splendid, some of the best posted men in the country being slated for talks and demonstrations, the U. S. Government lending exhibits, models, pictures, etc.

New telephone directories have been distributed to subscribers this week.

Land Value Raised 15 Per Cent.

Muhlenberg county land and property owners note a little neglect in listing their holdings, as the amount fell from \$4,239,146 to \$4,102,991. The matter was observed by the state board of equalization, and there has been a raise of 15 per cent. placed on lands. A committee from the county will appear before the board to argue the matter. Muhlenberg still retains its lead in the production of coal. The average value of farm lands, as listed, is \$8.38 per acre, but nobody can find any of that sort of land if he wants to buy it.

Dr. J. M. Ferguson was here from Central City Monday on business.

Automobile service, together with the new vehicle, and houses are getting accustomed to the new vehicle.

Work is being rushed on the addition to the Jones business house, and it will soon be ready for occupancy.

Seed, implement, wire, harness dealers are all having fine business these days.

There was lively trading on jockey alley court day. Most of the stock showed the ravages of winter.

Mail from the East has been arriving again the last day or two; it is a very old old up by the high waters which put all railroads in that section out of commission.

Mrs. H. V. Slaton has returned from a visit to relatives in Providence.

What Are You Going To Do This Year

CURIOUS BITS OF HISTORY

MAKING ENGLISH CITIZENS OF FRENCHMEN.

By A. W. MACY.

After the fall of Quebec, in 1759, Canada passed into the possession of England. It had at that time a resident population of perhaps 100,000. A large percentage of these were Frenchmen, who could not understand English and knew nothing of English laws and customs. Yet in making the transition from the French to the English took any account of this fact. The French king ceded the country to the English in the most amicable manner and form, without restriction; the English king proclaimed the country to be English and that is all there was to it. There was no reservation of the French tenure of land. In all respects the inhabitants were to be British subjects, and to be treated as such. As a matter of fact this did not make much difference to the French Canadians, for it was hardly possible that their condition could be worse than it was already. Such an extraordinary proceeding—to transform a hundred thousand Frenchmen into English subjects by a stroke of the pen, without taking their welfare into account one way or the other.

Breakfast Is Simplified

By the use of breakfast

foods prepared from the

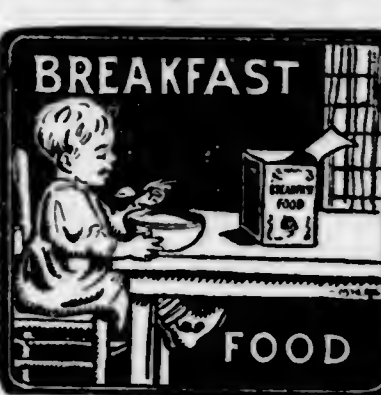

most nutritive parts of the

various cereals, they are

really a breakfast in them-

selves. The fact that they

are

Ready to be Eaten

(By the addition of cream and sugar.)

commends them to all housewives. We carry all standard brands: Kellogg's Toasted Corn Flakes, Post Toasties, Puffed Wheat, Puffed Rice, Shred Wheat, Rolled Oats, Uncle Sam Breakfast Food, Granula, Washington Crisps, Grape Nuts, Post Tavern Special.

W. H. BRIZENDINE & CO.

Everything Good to Eat

Greenville, Ky.

IN THE HEART OF THE THEATRE, SHOPPING AND OFFICE DISTRICT

YEAR BOOK of Stark Bro's Nurseries & Orchards Co.

MAILED TO YOU FREE

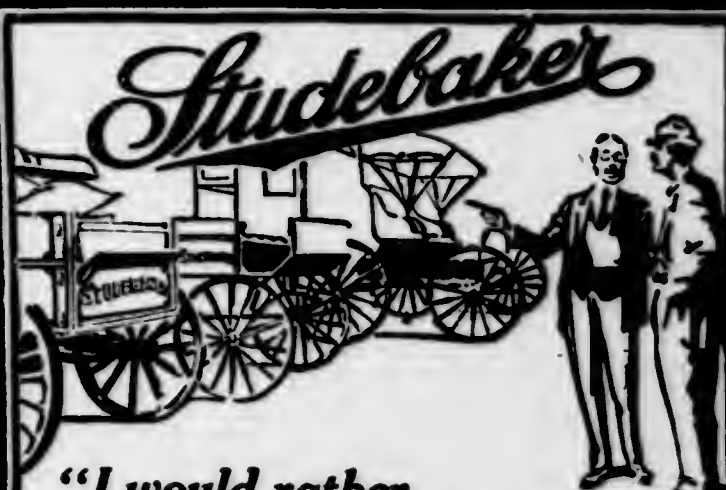

Just say on a Postal Card: "Send me a copy of Stark Year Book for 1913." When writing, also tell us how many trees, shrubs, vines, etc., you will probably plant this season.

This Year Book is more than a mere catalogue of Stark nursery products, it is a practical easy to understand text book for the guidance of the man who plants trees. Our own experience of nearly 100 years, the reports of experiment stations and the opinions of planters from all sections are condensed and reproduced for the benefit of busy people. An encyclopedia of orchard information, containing full size color illustrations of gloriously tinted fruits and many photographic reproductions in black and white; also information on many subjects in which the orchardist is interested. Hundreds of varieties of apples, pears, peaches, plums, cherries, apricots, quinces, grapes and all small fruits are described; weaknesses of each variety are pointed out and good points are explained. We feel that planters should know both.

Those interested in growing fruits or flowers or shrubs or shade trees will find this book of inestimable value; totally different from the average nurseryman's publications. It is a book you will keep for reference, and one on which you can depend as being absolutely accurate. Write today for your copy.

STARK TREES

STARK BRO'S Nurseries & Orchards Co. LOUISIANA, MO.

"I would rather sell you a Studebaker"

When your dealer tells you that you know he's honest.

He may have cheaper wagons in stock, but he knows the Studebaker is the best.

And so do you.

He wants to give such good wagon value that you will come back and demand a buggy made by the same people.

Studebakers have been building wagons for sixty years and they have won the confidence of dealer and farmer by building—not the cheapest—but the best wagons.

Whether you live in city, town or country, there's a Studebaker to fit your needs. Farm wagons, trucks, business and delivery wagons, surreys, buggies and runabouts, with harness for each of the same high quality as Studebaker vehicles.

Main Saloon, Full Kitchen, Smoking Lounge, Observation Room, Dining Room and Buffet all in highest type of decorative art.

Climate is cool; larger in all proportions than any

Comparative Digestibility of Food

Made with different Baking Powders

From a Series of Elaborate Chemical Tests:

An equal quantity of bread (biscuit) was made with each of three different kinds of baking powder—cream of tartar, phosphate, and alum—and submitted separately to the action of the digestive fluid, each for the same length of time.

The relative percentage of the food digested is shown as follows:

Bread made with
Royal Cream of Tartar Powder:
100 Per Cent. Digested

Bread made with
phosphate powder:
68 1/2 Per Cent. Digested

Bread made with
alum powder:
67 1/2 Per Cent. Digested

These tests, which are absolutely reliable and unprejudiced, make plain a fact of great importance to everyone: Food raised with Royal, a cream of tartar Baking Powder, is shown to be entirely digestible, while the alum and phosphate powders are found to largely retard the digestion of the food made from them.

Undigested food is not only wasted food, but it is the source of very many bodily ailments.

Local Mention.

Mc is back.

Mr. W. O. Belcher has been home for several days.

That was a typical county court crowd here Monday.

Farmers are the busiest people you can find these days.

Let Mac fix your clock—or watch, or jewelry. All work guaranteed.

Trains from the north have been delayed several hours on account of the water.

The annual meeting of the Kentucky Funeral Directors' Association will be held in Louisville on June 11, 12, 13.

Reports from the fruit crop indicate that the damage was slight, though the recent cold snap caused great apprehension.

Quite a number of persons went over to Central City Tuesday to see the Milwaukee regulars and recruits play ball.

Tuesday was Labor Day, and was observed by the miners of the county, none of the mines being operated that day.

Mr. John S. Miller returned home Saturday, from a stay of three months in Florida, and received great benefit from his stay in the land of flowers.

There were several useless trips made around town Tuesday, the April first joker being particularly active, and he found many willing subjects.

Mr. John A. Williams is spending a few days with relatives and friends here. He is en route to his home in Lexington, having spent the winter in Florida.

Mr. G. E. Countzler has received his new soda fountain, which is beautiful in outline and convenient in arrangement, adding much to the appearance of the store.

Take your beef hides to J. E. Coombs & Co. and get the cash.

Mc is back.

Sunday Services at Baptist Church.

The Special Missionary services of the Baptist Sunday school last Sunday were attended by a very large crowd. At the Sunday school hour the record for attendance was broken and by eleven o'clock the church was crowded and many failed to get seats.

An interesting program was given by the children upon the general subject of David Livingstone, whose centennial is now being celebrated, interspersed with music by the choir and followed by a short address by the pastor. The offering for home and foreign missions was taken by classes and amounted to \$711.55. Mr. J. W. Lam gave \$500 of this amount for the support of Missionary O. P. Maddock, whom he has supported ever since he has been in the field.

The Baptist Sunday-school under the splendid leadership of Superintendent John N. Taylor is doing excellent work and has the largest attendance in the history of the school.

On Sunday evening Dr. W. H. Henderson preached an unusually strong and helpful sermon at the Baptist church upon the Parable of the Prodigal Son, which was greatly enjoyed by a large and appreciative audience.

The domestic science club is having most gratifying sessions, and every member is enthusiastic in the work.

Mc is back.

New Boiler at Water Plant.

The general and generous increase in business at the light and water plant has made it necessary to enlarge the power, and a large boiler, counterpart of the two now in use, was received this week, and is being placed. This will add a third to the power, and is thought to be sufficient for some time to come. There has been a most satisfactory growth of business in all departments, more water and light connections being made constantly, and more plants being operated by power. The ice plant will be started soon, and there is a growing demand for that output, farmers everywhere now using ice. Manager Gilman is planning for a busy summer, and is getting everything in best condition for extra service.

Roark has the agency for the line of Sturges "Superba" baby carriages, one of the most complete lines on the market. See them before you buy; made right, look fine, priced right.

Committee Meeting.

On Saturday, April 5th, at one o'clock P. M., the county committees of both the Republican and Progressive parties of Muhlenberg County will meet at the court house in Greenville for the purpose of arranging for a county ticket to be nominated for county offices to be voted for at the November election, the purpose being to nominate said ticket by both of the parties. It is desired that as many people belonging to the two parties as can, be present at this meeting and all are invited to be present.

R. B. SHAYER, SEC. REP. COM.
J. ED. SHAYER, CHM. PROG. COM.

McCracken Returns to Shop.

Mr. A. E. McCracken, who for some months has been serving as a deputy circuit court clerk, but has kept up his watch repair work at odd times, has resigned his clerkship and is now at his shop in the Roark building, where he will devote his whole time and attention to watch and jewelry repairs. He has ordered considerable additional equipment and a large stock of watch and general repair stock, and solicits work, which will be done in best manner and guaranteed.

When you get "Quail" meal you get the best that is to be had.

George Seiber Dies.

Mr. George Seiber, a well known citizen, died at his home near Hillside Tuesday morning, following an attack of the grip, from which he had suffered for some days. Interment was made in the graveyard, on the farm, yesterday afternoon.

M. A. Oates has purchased Willis Heir a registered stallion and one of the best horses ever in the county. Service will be \$15. Telephone No. 19 1-2, Depoy.

Mc is back.

U. S. "Farm Doctor" Here.

Mr. F. E. Merriman, of the U. S. Agricultural Department, arrived here Monday, and will make Greenville headquarters in his work throughout the county. He has had wide experience, and offers his help to land owners of the county, analyzing the soil, studying local conditions, and in every way suggesting to farmers what the land needs, and what crops should be raised, as well as how to cultivate the crops. This service is free, and it is hoped our people will take advantage of this great help. Mr. Merriman has a horse and buggy, and is subject to call anywhere in Muhlenberg, and will make independent investigations as well, familiarizing himself with conditions so that he may increase his efficiency in this field.

Mr. J. B. Hudspeth Accepts Job in Danville.

Mr. J. B. Hudspeth, who has been home for a few days from Louisville, where he has been employed with Buschmeyer Bros., druggists, left the first of the week for Danville, where he has accepted a position with Mr. John S. Wells, druggist. Mr. Hudspeth has many friends here who are pleased at his deserved promotion.

Mc is back.

Kentucky Mining Institute.

The Program Committee of the Kentucky Mining Institute, for the meeting to be held May 16th and 17th, has selected 24 events for the State Wide First Aid Contest to be held on May 16th at Lexington, in connection with the Spring meeting of the Kentucky Mining Institute, and the judges, on the day of the contest, will select five of the problems, and these five problems will be performed by each team participating in the contest, and the prizes will be awarded upon the work performed in the problems so selected.

James W. McDonald Dies.

Mr. James W. McDonald, in his 76th year, died of heart trouble at his home near Cedar Grove church some time last Friday night, his family finding him dead early next morning. He was a prominent citizen and leading farmer, was widely known and held in high regard. Funeral services were held at Cedar Grove church at 1 o'clock Sunday afternoon, interment being made in the cemetery there. He is survived by his widow, three sons and two daughters.

Active work has been started on the experimental farm.

Newton Mansfield Dies.

Newton Mansfield died at his home in Luzerne at 6:30 o'clock Tuesday afternoon, following an illness of two weeks from pneumonia. He was a well known man, and had a host of friends, being popular with all who knew him, on account of his accommodating, clever, thoughtful regard for others. He is survived by his wife and seven children, who have the sympathy of everyone. Interment was in the graveyard at Pleasant Hill yesterday afternoon, and was largely attended.

Muhlenberg drew a 15 per cent. raise on lands at the hands of the State Board of Equalization.

A. E. McCracken, watchmaker and jeweler, is now at the bench regularly, and solicits the patronage of the public, promising quick service and guaranteed.

"Pittsburgh Perfect" Fence

Save Money on your Fencing by Putting up the Style Made to Meet your Requirements

It's downright foolishness to buy light chicken wire to put around your bull pasture—and you know it.

But some people do it because they don't think beyond the price-ticket on the roll of fence—at least not until they've had to patch the chicken wire a dozen times or so where that bull went through.

Made in Different Styles for FIELD, FARM, RANCH, LAWN, CHICKEN, POULTRY and RABBIT YARD and GARDEN

Ask your dealer for "Pittsburgh Perfect" and insist on his furnishing it. Do not allow him to persuade you that some other fence is just as good. If he doesn't sell it, write us direct.

"Pittsburgh Perfect" Brands of Barbed Wire: Bright, Annealed & Galvanized Wire; Twisted Cable Wire; Hard Spring Coil Wire; Fence Staples; Poultry Netting Staples; Regular Wire Nails; Galvanized Wire Nails; Large Head Roofing Nails; Single Loop Bale Ties; "Pittsburgh Perfect" Fencing. All made of Open Hearth material.
